RULES AND HOW TO PLAY

You have been summoned into a world, where you start off with a mere pistol. Through progression of different rooms in the world, you are able to defeat enemies and earn gold. Then, trading with merchants allow you to buy better weapons and battle your way out!

Controls are as follows:

Button	Output
W	Character moves forward
A	Character moves left
S	Character moves back
D	Characters moves right
LMB	Interact with UI and perform attack
Z	Interact with Shop
X	Interact with Loot Chest

N.B: All controls can be changed through settings. Shown are only the default controls.

Troubleshooting
Frequently asked Questions (FAQs)

Q: Why is my game not running?

A: The download file comes with everything that you will need. Please check your firewall settings, and allow for access. Redownload the game if nothing works and try again.

Q: Am I required to kill each room before I progress?

A: Yes, the enemies are here to prevent you from leaving this dark world. Only total annalihation of the enemies will mean you can progress.

Q: Why is Windows asking me to allow access to the game? Is it a virus?

A: Window's Firewall automatically flags unsigned application exes as viruses. Please allow access to the game to continue.

Q: Why can I not attack for some time when I shoot?

A: Due to the recoil of the weapon , as well as the reload time of your weapon, it will take some time for you to shoot again. Obviously, better weapons will mean a faster reload time.

Q: Is it possible to restart the game once you start?

A: At any time, you are able to press the 'home' button located on the top-right corner of your HUD. This will allow you to restart via going back to the main menu.
